BUILT FOR DATA CENTER CONDITIONS

01

Built To Handle Harmonics

Precision-engineered to minimize the losses from harmonics that are common in data center applications.

02

Liquid-Filled & Dry-Type

Liquid-filled and dry-type transformers for a wide range of data center applications, including enclosed TENV designs for demanding indoor environments.

03

Custom Engineering

Built for your application. Our engineers design around your voltage requirements, space constraints, operating conditions, and site environment.

04

E2X Padmount Transformers

Our leading padmount line, rated from 750 kVA to 5000 kVA, with high-voltage ratings from 4160 V to 34500 V.

05

Reliable, Efficient Power

Designed to deliver reliable power while reducing transformer losses and controlling operating costs.

06

Specialty Applications

Solutions for grounding, voltage regulation, autotransformers, multi-winding applications, large specialty padmounts, and other complex power requirements.
