INDUSTRY DATA SHEET

# MINING

## POWER FOR THE HARSHEST ENVIRONMENTS.

Custom transformers for mining operations, from the largest US-owned manufacturer.

### SHORTEST LEAD TIMES

IN THE INDUSTRY, ACROSS OUR  
FULL RANGE

6

PLANTS ACROSS  
NORTH AMERICA

LIFE

## BUILT FOR MINING CONDITIONS

01

### Harsh Environment Protection

Built for dust, dirt, moisture, chemicals, and airborne contaminants. We design each transformer for the conditions at your site.

02

### Liquid-Filled & Dry-Type

Liquid-filled and dry-type transformers for a wide range of mining applications, including enclosed TENV designs for demanding indoor environments.

03

### Custom Engineering

Built for your application. Our engineers design around your voltage requirements, space constraints, operating conditions, and site environment.

04

### Drive & Rectifier Duty

Drive isolation, variable-speed drive, and rectifier transformers for demanding motor loads, including 18, 24, and 36-pulse designs.

05

### Reliable, Efficient Power

Designed to deliver reliable power while reducing transformer losses and controlling operating costs.

06

### Specialty Applications

Solutions for grounding, voltage regulation, autotransformers, multi-winding applications, large specialty padmounts, and other complex power requirements.

PROVEN IN THE FIELD

# MINING RUNS ON VIRGINIA TRANSFORMER.

TRUSTED BY MINING LEADERS

MINING DELIVERIES FROM THE PORTFOLIO

## BAILEY MINE • ALEPPO TOWNSHIP, PA

Padmount units powering North America's largest underground coal complex.

# 1971

## Our Roots Are Underground

We started underground. Draglines, shovels, crushers, and conveyors still run on us today.
